

ABOUT OUR CALENDAR

Moreland University begins online cohorts on a monthly basis, for certification as well as master’s programs, meaning that we do not follow standard academic calendar conventions (semesters or terms). The calendar below reflects which courses begin in which time frame (range of dates) each month. If there are 15 cohorts for the certification program, for example, those cohorts launch over a period of several days, and subsequent course (module) start dates for each cohort follow as and when the initial course (module) is completed.

Moreland University is a *continuous enrollment institution*, meaning that candidates are automatically enrolled in the module that follows immediately the one just finished. Please see the Course Catalog & Candidate Handbook for the sequence of courses, as well as the section on Academic Calendar for further details, exceptions for clinical placement, and our policy on holidays.

JULY 2021

| | | |
